

Direct Access Testing

In keeping with our mission to provide exceptional quality care, every step of the way, we are pleased to offer a selection of laboratory health profiles. These are conducted by the Cumberland Healthcare Laboratory, designed to evaluate your current health status via a simple blood draw—at a discounted price. A physician's order is not required.

Direct Access Lab Testing is for those who want to learn about their health status without large out-of-pocket expenses.

Direct Access Testing allows individuals to request laboratory tests and receive results without a provider's orders or insurance involvement. An appointment is necessary.

You will receive education information with your test
